PowerBook: Urethane-Based Paint Recommended for ID Label (11/94)

Article Created: 23 October 1991

Article Reviewed/Updated: 29 November 1994

TOPIC -----

I want to paint my company name on my PowerBook for security and identification purposes. What type of paint does Apple recommend for the Macintosh PowerBook?

DISCUSSION -----

Apple recommends using a urethane-based paint. Be sure to use a primer coat on the polycarbonate plastics first because the finishing paint will not adhere directly to the polycarbonate.
