Assistant Toolbox Extension: Version History (11/95)

Article Created: 4 August 1994
Article Reviewed/Updated: 27 November 1995

```
TOPIC ------------------------------------------------------------
```

This article describes the version history for PowerBook File Assistant's
Assistant Toolbox extension.

```
DISCUSSION -------------------------------------------------------
```

PowerBook File Assistant 1.0 itself has not changed. It is still version 1.0.
The only changes that have been made in all new versions of the PowerBook File
Assistant so far have been updates to the Assistant Toolbox extension.

```
Versions Since Assistant Toolbox 1.0
====================================
```

1.1

All 500 Series PowerBooks that came with System 7.1.1 pre-installed contain
Assistant ToolBox extension version 1.1.

1.2

All PowerBook computers that came with System 7.5 pre-installed and System 7.5
Upgrade Kits include Assistant ToolBox extension version 1.2.

```
Assistant Toolbox Change History
================================
```

From 1.0 to 1.1

• Print Later - fixed a problem that caused the system to crash when Print Later
was selected on a Duo.

• AutoRemounter - fixed a problem that caused a crash on Macintosh Classic
computers.

• Video Mirroring - removed the cursor marks that appeared on external
monitors.

• PRAM - changed PRAM location for storing Persistent RAM Disk information.

From 1.1 to 1.2

• This is the currently supported version although there are no major changes
documented.

Article Change History:
27 Nov 1995 - Updated information on which versions shipped on which computers.
20 Jul 1995 - Corrected spelling of AutoRemounter; reviewed.
