## Paging Up and Down Keyboard Shortcut: No Standard Mapping(12/94)

Article Created: 1 December 1994

TOPIC -----

I have a PowerBook that doesn't have page up and page down keys on the keyboard. Is there anyway to simulate these functions?

DISCUSSION -----

There is no built in mapping to allow a user to use those functions. However, many (if not most) applications support <ctrl-k> and <ctrl-l> sequences for page up and page down, respectively. There are also a variety of utilities that will allow you to virtually macro these keys.
