Centris 660AV & Quadra 840AV: Speech Recognition & RAM (8/93)

Article created: 10 August 1993

TOPIC ---

Can I reduce the amount RAM needed to use Speech recognition on the
Macintosh Centris 660AV and Quadra 840AV??

DISCUSSION --

Speech recognition requires a lot of memory. To reduce the amount of
RAM used for speech, select a compressed voice for feedback to
spoken commands, or set feedback to None rather than having
voice feedback.
