Centris 660AV & Quadra 840AV: S-video ports (8/93)

Article created: 10 August 1993

TOPIC --

This article provides details on the Macintosh Centris 660AV
and Quadra 840AV S-video ports.

DISCUSSION ---

Connecting Cables to the S-video ports

Take care to connect only S-video cables to the S-video port:
Your computer will not start up if the cable for a serial device,
such as a printer or modem, or an Apple Desktop Bus (ADB) cable is
plugged into the either of the S-video ports.

Power Requirements

Devices connected to the Camera/S-video input port use power as follows:
Camera/S-video device   +12 volts   500 milliamperes   6 watts

This updated information supersedes the requirements for the S-video input
port in the Technical Information manual which comes with the Centris 600AV
and Quadra 840AV computers.
