Macintosh Quadra 660AV and 840AV: Startup Failure Tone (11/95)

Article Created: 29 November 1995

TOPIC -----

Whenever I attempt to start up my Macintosh Quadra 660av computer, the computer plays a "bongo drum" sound. What is causing this?

DISCUSSION -----

The "bongo drum" sound is the startup failure tone on the Macintosh Quadra 660av and 840av computers. Such a failure could be caused by either software or hardware problems. To troubleshoot this error tone, see the Tech Info Library article, "System 7.x: Troubleshooting Startup Problems".
