Macintosh AV Systems: Connecting to Large TVs (10/93)

Article Created: 28 October 1993

TOPIC -----

This article describes how to connect a large-screen television monitor to a Macintosh AV system. (At this writing, these are the Centris 660AV, Quadra 660AV, and Quadra 840AV.)

DISCUSSION -----

- 1) Connect an RCA-type cable from the NTSC video-out port to the TV monitor that you wish to use.
- 2) In the Monitors control panel, click the Options button, then:
 - choose Display video on Television.
 - choose either NTSC or PAL
 - choose flicker-free format
- 3) Click OK.

The video-out will then change from the normal display to the TV Monitor that is connected to the computer.
