Macintosh Quadra 900: Supported Drive Configurations

Article Created: 7 January 1992
Article Last Reviewed: 21 May 1992
Article Last Updated: 21 May 1992

TOPIC -----

What are the supported drive configurations for the Macintosh Quadra 900?

DISCUSSION -----

These are the supported drive configurations for the Macintosh Quadra 900:

- 1 Apple SuperDrive drive and up to 3 half-height SCSI drives
- 1 Apple SuperDrive drive, 1 full-height SCSI drive, and 1 half-height SCSI drive

The following configurations are supported, but not recommended because the Apple SuperDrive must be removed, which makes system administration and software upgrades difficult:

- 2 removable-media drives and 1 full-height SCSI drive
- 2 removable-media drives and up to 2 half-height SCSI drives
