Macintosh Quadra 900 Tech Procedures: Pixel Depth Correction

Article Created: 14 May 1992
Article Last Reviewed:
Article Last Updated:

TOPIC ---

Currently we have two sources of information on pixel depth for the
Macintosh Quadras:

- Technical Procedures for the Quadra 900, p. 5.4 (Additional Procedures)

- A Tech Info Library article titled "Macintosh Quadra: Pixel Depth for
  Various VRAM Configurations"

There is a discrepancy between them when comparing "PAL with convolution."
Technical Procedures says "millions" of levels, while the Tech Info Library
article says 256 levels.

DISCUSSION --

The Quadra 900 Technical Procedures are incorrect, and will be corrected in
a future version.
