System 7.1: Special Note for Installing on a Quadra

```
Article Created: 19 October 1992

TOPIC -----------------------------------------------------------

This article gives special instructions for installing System 7.1 on a
Macintosh Quadra 700, 900, or 950.

DISCUSSION ------------------------------------------------------

When installing System 7.1 on a Macintosh Quadra, use the Installer's Easy
Install option or choose "System software for any Macintosh" in the Custom
Install window.

Do not choose the "Macintosh Quadra" option in the Custom Install window,
because parts of the Monitors control panel will not install properly.
