Performa Basics: Can't Use on a Performa 200 (6/94)

Article Created: 16 Jun 1994

TOPIC --

When launching Performa Basics on the Performa 200, a message appears stating
that the Performa 200 cannot be set to 16 colors, so the application will NOT
run. It seems that Performa Basics requires a color monitor.

DISCUSSION ---

This is true. Performa Basics would not be useful for a Performa 200 user.
Basic operation of the computer is thoroughly outlined in the User's Guide.
