Performa 550: Video Out Solution (12/93)

Article Created: 2 December 1993

TOPIC -----

I received a Performa 550 for my classroom and wish to use it for class presentations by connecting an external monitor. Is this possible?

DISCUSSION -----

Power R, Inc. has developed a video out solution for the LC 520/Performa 550 called the Presenter 520. The Presenter 520 allows for output to an external monitor or LCD (liquid crystal display) panel, making it easy to display the LC 520 screen in a classroom setting.

The PowerR Presenter 520 installs in minutes with no tools and drives color or monochrome LCD panels and monitors. It installs directly onto the logic board (the video chip), leaving the LC 520 PDS slot available for an additional card. The PowerR Presenter 520 has both D-15 (Macintosh) and HD-15 (VGA) connectors for external monitors or LCD panels.

NOTE: The Presenter 520 is NOT compatible with non-multisync VGA monitors such as the Apple Basic Color Monitor.

PowerR Presenter 520 has a special educator price of \$116.10.
