Performa 600, Macintosh IIvx, IIvi: IIci Cache Cards

Article Created: 7 December 1992

TOPIC -----

Is there a list of Macintosh IIci cache cards that are compatible with the accelerator slot on the Performa 600? Specifically, will Apple's IIci Cache Card work?

DISCUSSION -----

Apple's IIci Cache Card is not compatible with the Performa 600, the Macintosh IIvx or the Macintosh IIvi (not sold in U.S.).

Apple has not done extensive testing with cache cards, but some cards designed for the Macintosh IIci do work. We recommend you contact the vendor of the cache card.
