## Performa: How to Use QuickTime Support (7/93)

Article Created: 21 July 1993

TOPIC -----

I have downloaded the new scrapbook that supports playing QuickTime movies. It plays the QT logo movie, but when I try to cut and paste another movie all that is pasted is a text file of the QT movie title. What am I doing wrong?

DISCUSSION -----

The new clipboard supports QuickTime movies, but in order to get movies to the clipboard, you need to use an application that plays QuickTime movies, like MoviePlayer or Popcorn. With these applications (and others like them), use the Edit menu, choose Select All, then Copy, then Paste the item into the scrapbook.
