Performa: Using Telecommunication (7/93)

Article Created: 21 July 1993

TOPIC -----

I have a Performa 450. How can I learn more about using the modem? I'm interested in finding a local user group Bulletin Board Service (BBS).

DISCUSSION -----

To dial a local BBS, you will need to use a terminal program such as Zterm, or the telecommunication portion of the Works package that came on your Performa computer. Since telecommunication is the hardest thing to learn on the computer, it is best to locate a telecommunication "veteran." A good place to start looking for one is at your local user group.
