Performa: Checking Proper Installation of TelePort Modem (2/94)

Article Created: 25 February 1994

TOPIC ---

Can I tell if the Global Village TelePort Bronze Modem is connected and
the Global Village fax software is installed properly without sending a
fax?

DISCUSSION ---

Yes. From the TelePort/Bronze Modem Control Panel, you can confirm proper
installation of both the modem and the software.

1) Open the TelePort/Bronze control panel

2) Click the change port icon

3) Change the port by selecting the modem or printer icon that is not
   highlighted

If the incorrect port is selected, the volume slider bar dims. If the incorrect
port is selected, switch it back by following steps 2 and 3. When the proper
port is selected, you can move the volume slider bar. This indicates that the
Global Village TelePort/Bronze software is installed properly, and the modem is
properly connected to the Macintosh.
