Performa 575: Using LC 575 Communication Cards (5/94)

Article Created: 13 May 1994

TOPIC --

Is it possible to install the Macintosh Express Fax/Modem for the Macintosh LC
575 (M2480LL/A) in the Communications slot of the Performa 575? Also, does the
Apple Ethernet CS Twisted Pair Card (M3065Z/A) and Apple Ethernet CS AAUI Card
(M3066Z/A) work with the Performa 575?

Since all three products are for use with the LC 575, are they are supported
with the Performa 575?

DISCUSSION ---

All options supported in the LC 575 are supported in the Performa 575. Both
cpu's are essentially the same except the Performa software, which has tested
fine with all the communication slot options.
