

## Power Macintosh 5200/75 LC: Mirrored Video Port Pin-Outs (7/95)

Article Created: 17 July 1995

TOPIC -----

Could you provide the Mirrored Video Port (MVP) pin-out information for the Macintosh 5200/75 LC and Performa computers?

DISCUSSION -----

Because the MVP Video output is a mirrored version of the internal video, the display resolution is set by the internal monitor setting. The MVP port retains the same monitor size as is set for the internal monitor.

The pin-outs are as follows:

Mirrored Video Port (MVP)

| DB-15 | MVP Con | Description         |
|-------|---------|---------------------|
| ===== | ======  | ========            |
| 1     | 1       | Ground              |
| 2     | 3       | Red Video           |
| 3     | 5       | Composite Sync      |
| 4     | 7       | NO Connection       |
| 5     | 9       | Green Video         |
| 6     | 11      | Ground              |
| 7     | 13      | NO Connection       |
| 8     | 15      | Attn Dot Clk Signal |
| 9     | 2       | Blue Video          |
| 10    | 4       | NO Connection       |
| 11    | 6       | Ground              |
| 12    | 8       | Vertical Sync       |
| 13    | 10      | Ground              |
| 14    | 12      | Ground              |
| 15    | 14      | Horizontal Sync     |
| Shell | 16      | Ground              |
