Macintosh Performa 6200: Using 28.8 GVC Modem (8/96)

Article Created: 27 August 1996

TOPIC ---

Will the Global Village internal 28.8 modem which ships with the Macintosh
Performa 6300 series work in a Macintosh Performa 6200 series computer? If so,
what special steps are necessary?

DISCUSSION ---

Yes, the the Global Village internal 28.8 modem is compatible with the Macintosh
Performa 5200, 5300, 6200, and 6300 series computers. However, the software
included with the Global Village Gold IIv internal 14.4 modem is NOT compatible
with the higher speed modem. You need to use update the software using the
GlobalFax 2.5.6 installer.
