## Macintosh 630 family: VideoShop Can't Record From TV (8/94)

Article Created: 29 August 1994

TOPIC -----

I am trying to record video from the TV Tuner card in my Quadra 630 with VideoShop and it is not working. Is this a known problem and is there a workaround?

DISCUSSION -----

It seems that VideoShop is unable to record from the TV Tuner, in fact, TV is not even an input source option in the Video Settings screen. According to Avid, the QuickTime vdig which is included in the 630 does not allow Quicktime software to connect through to the TV Tuner.

The only workaround is to record the TV signal through Apple Video Player and then import that QuickTime movie into VideoShop.
