TOPIC ----------------------------------------------

Will the Kinetics EtherPort II card work in a Macintosh II running the
AppleTalk Internet Router?  If yes, what release of the drivers is
required?

DISCUSSION -----------------------------------------

Yes, the Kinetics EtherPort II card does work in a Macintosh II running
the AppleTalk Internet Router.

Version 2.5 of the EtherPort II software, which is AppleTalk Phase
2-compatible, is required.

The EtherPort II cards are now supported by Dayna Communications; for more
information, search under "Dayna".
