Article Last Updated:

TOPIC -----

I am trying to connect a Graphtec MP3100 plotter to a Macintosh, but I don't have the right cable. Do you know what this cable should look like (from the 8-pin serial port on the Macintosh to the DB-25 port on the plotter)?

DISCUSSION -----

The Graphtec plotter can be connected to a Macintosh 8-pin serial port using M0199; the Macintosh-to-ImageWriter cable (pn 590-0553).
