System 7: Compatibility of E-Machines Products

Article Created: 8 August 1991

Article Change History

09/02/92 - REVIEWED

- For technical accuracy.

TOPIC -----

What are the System 7-compatible versions of the E-Machines monitor driver software?

DISCUSSION -----

Here are the versions of E-Machines monitor driver software required for System 7:

- For the 8-bit cards: version 3.0.2 or later
- For the 24-bit accelerated cards: version 3.2 or later

The only known compatibility issue is with E-Machines' 17-inch Big Picture monitor. After you choose Shutdown, it displays a restart screen.

For the latest version and compatibility information, contact E-Machines directly; search on E-Machines for contact information.
