DaynaFile: Use Driver Version 2.8 with Macintosh IIfx

Article Created: 13 May 1991

Article Last Reviewed: 31 May 1991

Article Last Updated:

TOPIC -----

I connected a DaynaFile floppy drive to the Macintosh IIfx. Everytime I insert a disk into the drive, the drive reads it and then the system locks up.

Any ideas?

DISCUSSION -----

Dayna's Tech Support group told us that version 2.8 of the driver is required to use the DaynaFile on the Macintosh IIfx. Customers can get a copy of the driver by contacting Dayna directly.
