Quadra: Where to Find Brackets for Drives (8/93)

Article Created: 11 August 1993

TOPIC -----

I bought a third-party tape drive for my Quadra and it didn't come with the proper size bracket or a faceplate for the front of the computer. Can I order these items from Apple?

DISCUSSION -----

Apple does not sell these parts individually.

You'll need to contact the vendor who sold the storage device to obtain the correct bracket and front template for your Quadra.

If you have any problems, contact your local authorized Apple dealer or call Apple's Customer Assistance Center for further help.
