Macintosh LC 575: Video Out Solution (5/94)

Article Created: 23 May 1994

TOPIC -----

I am using a Macintosh LC 575 and wish to use it for presentations by connecting an external monitor. Is this possible?

DISCUSSION -----

Video output to external monitors or LCD panels can be achieved on Macintosh LC 575 systems through the use of Presenter 575 by Power R, Inc. The Presenter 520 (for the Macintosh LC 520/550 and Performa 550) is not compatible with the Macintosh LC 575.
