AppleScript: Displaying Custom Icons (11/93)

```
Article Created: 29 November 1993

TOPIC ------------------------------------------------------------

How can I display custom icons?  I can display the yield sign,
stopping hand, and talking man, but other icons won't display.

DISCUSSION -------------------------------------------------------

The icon you want to display has to be in one of three places:

• In the resource fork of the script file

• In the system file, or

• In the current application.
