## AppleSearch: MacLinkPlus 7.02a XTND (1/95)

Article Created: 17 June 1994

Article Reviewed/Updated: 27 January 1995

TOPIC -----

This article describes the new MacLinkPlus AppleSearch 7.02a XTND and MacLinkPlus AppleSearch Trans1 v. TR 7.02a.1, and where to obtain them.

DISCUSSION -----

The new MacLinkPlus AppleSearch 7.02a XTND, and MacLinkPlus AppleSearch Trans1 v. TR 7.02a.1 should be use to replace the one shipping with the AppleSearch Server 1.0 and 1.0.1. This software is included with AppleSearch 1.1 and higher.

This new XTND resolves a number of crashing problems with AppleSearch servers, especially with Microsoft Word files. It should be obsolete in the future, but if a customer is having problems with server crashes and they're using Microsoft Word (or even if they're not) they should install this XTND, delete their indexes, and re-index. We've found this new XTND resolves many server crashes.

Article Change History:

27 Jan 1995 - Corrected where to find software.
