At Ease 2.0.3 for WG: Searching for At Ease Server (8/95)

Article Created: 5 June 1995
Article Reviewed/Updated: 14 August 1995

TOPIC ---

I have At Ease for WorkGroups, and this morning all the workstations have the
following message on the screen, "Searching for the At Ease Server volume". I
can see the server in the Chooser on the workstations when they're in the
Finder, but At Ease doesn't see it. How do I fix this?

DISCUSSION --

You should follow the steps below to resolve your problem:

1) Set the At Ease Disk to be the startup volume
2) Restart
3) Reset the At Ease Disk to be the server
4) Restart and verified that the computer is using the server
5) Updated all the other computers on the network
6) Ran At Ease Setup on each computer to use the new preferences file
