## At Ease 1.1: Gather Applications Address Error (8/95)

Article Created: 19 May 1993

Article Reviewed/Updated: 08 August 1995

TOPIC -----

With At Ease 1.1 installed on a Macintosh Classic running system software version 7.1, selecting "Gather applications" gives an address error. This has only been observed on 68000 CPUs such as the Macintosh Plus, SE, and Classic. If you have At Ease 1.1, and are experiencing this problem, obtain version 1.0.

DISCUSSION -----

The good news is, At Ease 1.0 does not have this problem. We removed At Ease 1.1, installed At Ease 1.0, and again selected "Gather applications," this time with no problems.

The primary change in At Ease 1.1 was to sort the At Ease items correctly for international users. It's likely that this change caused this problem. If you're using an English system, At Ease 1.0 should work just as well as At Ease 1.1 for you.
