At Ease: Icon on Floppy Not Copied to At Ease Screen (8/95)

Article Created: 27 May 1993
Article Reviewed/Updated: 08 August 1995

TOPIC ---

The icon of an application on a floppy disk won't copy to the At Ease screen;
At Ease only shows the generic icon for the application unless I cut and paste
the icon to the alias.

DISCUSSION --

The icons used by At Ease must be in the desktop file of the hard drive. You
can rebuild the desktop file with the application present on the hard drive,
then remove the application, or you can cut and paste an icon into the Get
Info window for the alias as you have done already. This is the same way the
Finder functions.
