At Ease 2.0: Disk Copies NOT Bootable (8/95)

Article Created: 1 Jul 1994
Article Reviewed/Updated: 08 August 1995

TOPIC ---

I'm finding that the copy I made of the Utilities disk does not restart the
computer (but the original Utilities disk does).

DISCUSSION --

A common way of making a copy of the Utilities disk in the Finder is to drag the
icon of the floppy disk to the hard drive, which copies its contents into a
folder named Utilities, then drag these contents onto an empty floppy disk,
re-labeling it 'Utilities.'

Unfortunately, when the you start up with At Ease ON, go to the Finder, and then
do the above procedure, the result is a disk that is NOT bootable.

Turn At Ease OFF and restart before attempting to create a new Utilities disk.
(This issue arises when trying to make a Utilities disk equipped with PC
Exchange).
