At Ease 3.0: How to Install on 800K Drive Macintosh (8/95)

```
Article Created: 03 August 1995
Article Reviewed/Updated: 08 August 1995

TOPIC -------------------------------------------------------------

I want to install At Ease 3.0 on my Macintosh computer, but it only has a 800K
drive. Is there a way to get At Ease 3.0 on 800K floppy disks?

DISCUSSION --------------------------------------------------------

At Ease 3.0 and At Ease 3.0 for WorkGroups are available only on high density
floppy disks.  The outside of the box explains that the media is on 1.4 Mb
floppy disks and an Apple SuperDrive floppy disk drive is required.

If your 800K drive equipped Macintosh computer is on a network, you can install
At Ease 3.0 by doing a network install. The At Ease 3.0 for WorkGroups
Administrator's Guide explains how to do this starting on page 20.  You can also
refer to the TIL article "Software Installation Over a Network" for a
description of how to do this procedure.
