At Ease 3.0: Use Button Disabler To Prevent Sound Access (1/97)

Article Created: 4 October 1995
Article Reviewed/Updated: 7 January 1997

TOPIC ---

At Ease for WorkGroups 3.0 allows the administrator to keep students from
opening control panels, specifically the Sound control panel. However, on the
Macintosh Performa/LC 520, 550, 575, 580, 5200, 5300, and 5260 series of
computers, there are volume controls on the front of the computer that still
work even when the students do not have access to the control panels. How can I
prevent students from using these buttons to defeat At Ease?

DISCUSSION --

System 7.5 includes a Control Panel called Button Disabler that can be installed
with a custom system software install. This control panel has a single check box
that, when checked, deactivates the sound and brightness controls on the front
of Macintosh computers with built-in controls.

Use the Custom Install feature of your Macintosh CD to install the Button
Disabler control panel, restart your computer, and click to place an 'X' in the
box to the left of "Disable Buttons".

Article Change History:
07 Jan 1997 - Removed the Performa 5400 from the article.
11 Sep 1996 - Added the Performa/LC 5260, and 5400 series computers.
23 Oct 1995 - Clarified Control Panel settings.
