At Ease 4.0: Location Choices Dimmed (10/96)

Article Created: 1 October 1996

TOPIC -----

In the Locations window of At Ease 4.0 Setup, if I select the Require Users To Open and Save In Approved Locations radio button, I see all of the save check boxes and all but two of the location check boxes grayed out. Only the User Documents Folder Open and the Removable Media Open checkboxes are active.

In addition, balloon help will report that the options are grayed out and states something like, you have specified that members can open or save anywhere.

DISCUSSION -----

Location choices require that at least one Open location be selected before any save options become available. The user must select Open checkbox beside either "User's Document folder" or "Removable Media" before any of the other checkboxes will become available.

The balloon help incorrectly reports that the "Allow user to Open and Save anywhere" radio button has been selected. Ignore it.
