At Ease Administration: Error While Editing Workgroup (11/96)

Article Created: 21 November 1996

TOPIC -----

I am using At Ease Administration to administer my At Ease 4.0 network. When I try to change the information in one of my workgroups I get the following error, "An error occurred while trying to edit the workgroup xxxxxx." What do I do to fix this?

DISCUSSION -----

The workgroup you are working with has probably become corrupted and cannot be fixed. One option is to duplicate the workgroup by clicking the Duplicate button. The duplicate can now be edited, so you can delete the original and use the duplicate.

Another option would be to delete the workgroup which is getting errors, and build a new workgroup.
