At Ease 4.0, Power Macintosh, & Student Writing Center (2/97)

Article Created: 6 February 1997

TOPIC -----

Some early versions of the Apple Education Series Bundles shipped with the Student Writing Center version 1.0.1. This version of the Student Writing center conflicts with At Ease 4.0.x when installed on a Power Macintosh 5400 computer, this may affect other Power Macintosh models as well. In a Panels environment, at launch the Student Writing Center quits back to the Panels environment. In a Restricted Finder environment, the program quits with a Type 1 error. The application works correctly in a Full Finder environment.

DISCUSSION -----

To resolve this update to Student Writing Center version 1.0.5. For more information about updating, contact:
