### TOPIC -----

The following discusses printing with MacDraw 1.9 and 1.95 without page breaks.

### DISCUSSION -----

When its rulers are set to centimeters, MacDraw 1.9 and 1.9.5 put a break between pages even though you select "No Breaks Between Pages".

You can work around this by drawing your document in the normal manner and changing the ruler increments to inches just before printing. MacDraw then prints without page breaks.
