DAL Developer's Toolkit: Callable Libraries

Article Created: 4 March 1990
Article Last Reviewed: 29 June 1992

TOPIC -----

Is it possible to use LightSpeed C 3.02 to call the XCMDs (external commands) for Data Access Language (DAL, formerly known as "CL/1")? I currently have the externals for HyperCard.

DISCUSSION -----

The DAL Developer's Toolkit for Macintosh includes callable libraries for:

- LightSpeed C
- MPW C
- MPW Pascal

in addition to HyperCard XCMDs.

Most of the commercial developers who have already developed products on top of DAL (ClearAccess, Omnis 5, 4th Dimension, MacDBC) have used Lightspeed C or MPW Pascal libraries.
