DAL: Username and Password not Encrypted During Access (2/95)

```
Article Created: 16 March 1991
Article Reviewed/Updated: 3 February 1995

TOPIC -------------------------------------------------------------

When establishing a DAL session with a VAX over AppleTalk, is username and
password information encrypted?

DISCUSSION --------------------------------------------------------

The username and password information is not encrypted when sending to the host
because AppleTalk does not encrypt.  DAL does not furnish encryption, but uses
whatever the network supplies.

Article Change History:
03 Feb 1995 - Corrected reference to AppleTalk.
