DAL: How to Sort by Month and Year

Article Created: 12 August 1991
Article Last Reviewed: 6 July 1992
Article Last Updated: 6 July 1992

TOPIC -----

I am using DAL and want to order a selection by the month and year, not necessarily by date. DAL only orders things by the full date, not month and year.

DISCUSSION -----

The DBMS is the one actually doing the ordering (sorting). The SQL statement can only request ORDER BY against a column name -- not a portion of a column. Your only option is to retrieve the data, parse it yourself for the desired portions, and sort on those in your Macintosh application. Copyright 1991, 1992 Apple Computer, Inc.
