Article Last Updated:

TOPIC -----------------------------------------------------------

I have discovered an error in the DAL 1.3 Macintosh Installation and User's
Guide.  The section on Protocol Converter connections, page 45, incorrectly
specifies the "Escape" character as ^].  It should be ^[ (that is, Up
arrow, LEFT bracket).

It is shown properly in the example for PFkey 3: ^[3.

DISCUSSION ------------------------------------------------------

Thanks for the information.  This is helpful to people who use a Protocol
Converter and key definitions that include Escape character sequences.
