TOPIC -----

I want to put servers on Apollo and Ultrix-based VAX workstations so Macintosh computers can access the data there. I need a list of current DAL servers.

DISCUSSION -----

The following are available from APDA:

- Data Access Language Developer's Toolkit
- Data Access Language Server for VAX/VMS (9 track format)
- Data Access Language Server for VAX/VMS(TK 50 Format)
- Data Access Language Server for VM/CMS
- Data Access Language Server for MVS/TSO
- Data Access Language Server for A/UX v1.3
- Data Access Language Server for MVS/VTAM v1.3

Since you're looking for a DAL server for Ultrix and Apollo UNIX, the answer is very likely to come from Pacer.

Here is the latest information from the DAL Product Manager:

- Pacer Software announced a DAL Server for HP/UX, and DAL Server for SunOS on Sun SparcStation. Transport methods are TCP and Asynchronous. Databases supported are Ingres, Oracle, Informix, and Sybase.

They also have plans for DAL Server for Ultrix, and DAL Server for RS/6000 platform in early 1992.

- Novell is shipping on a DAL Server for Netware.
- Tandem is currently shipping DAL Server Tandem.
- Data General is working on a Server Product. Please contact directly for expected shipping date.

- Blyth Software is shipping DAL Toolkit for MS/DOS. AttachMate Software is required.
