## DAL 1.2: Fix for AppleTalk Connections Dropping

```
Article Created: 12 August 1991
Article Last Reviewed: 29 June 1992
Article Last Updated:

TOPIC -----------------------------------------------------------

I am running DAL 1.2 on a VAX and my AppleTalk connections occasionally
drop into a mutex state.  When AppleTalk for VMS drops into this state, I
can't make a connection to DAL.

DISCUSSION ------------------------------------------------------

This is a known problem with DAL and a patch is available on tape to fix
the problem.  To get a copy of the patch:

- Apple SEs should contact Tech Comm.

- Apple customers should contact the DRC.
