Scrapbook: In Finder 5.1 Scrolls Slowly Between Items

Article Created: 21 April 1986

Article Last Reviewed: 27 May 1992

Article Last Updated: 27 May 1992

While in Finder 5.1 (at the Desktop), the Scrapbook may take a long time to scroll from item to item. This happens because the Scrapbook looks through ALL available open resources as it scrolls. When the system is at the Finder level, there are many open resources. This behavior is not exhibited from within most applications since most applications keep fewer resources open.
