## Early Language Connections bundle: Current Issues (1/97)

Article Created: 7 January 1997

TOPIC -----

This article contains a list of known issues with the Early Language Connections bundle V5.2.

DISCUSSION -----

- At Ease sometimes draws a gray menu bar. However, the menu is still active and functional.

- At Ease and Energy Saver: If you skip the configuration of Energy Saver, and do set-up At Ease, an error message appears from At Ease upon launching.

Workaround: This issue and the workaround is documented in the Early Language Connection Bundle documentation.

- At Ease: when "Speak Button Names" is enabled and Virtual Memory is active, the voice stutters when the button name is spoken.

Workaround: Turn-off Virtual Memory.

- Muppets on Stage: Pressing Command-period causes Muppets On Stage to quit. There is no workaround.

- SuperPrint does not support desktop printing.

Workaround: Print from within the SuperPrint application.

- Grady Profile: when the date is asked for, the default year displayed is "94-95". The year can be changed and does not affect the performance of the application.

Note:

Cinderella, Paperbag Princess, Peter Rabbit, and Mud Puddle install the system software extensions QuickTime, and Sound Manager, or make them available for you to drag-install.
