System 7: Installing Adobe Font Library

Article Created: 19 June 1991
Article Last Reviewed: 13 July 1992
Article Last Updated: 13 July 1992

TOPIC -----

This article gives instructions for installing the Adobe Font Library on a Macintosh running System 7.

DISCUSSION -----

- To install bitmap (screen) fonts, simply drag the font suitcase to the System Folder icon and System 7 will automatically install them in the System file. System 7 does not require Font/DA Mover to install bitmap fonts.
- To install outline (printer) fonts, simply drag the font icons (not the folder containing them) to the System Folder. System 7 will automatically install them in the Extensions Folder.

NOTE: If you are using a version of Adobe Type Manager prior to 2.03, you must move outline fonts from the Extensions Folder to the System Folder to work properly. If you are using 2.03 or later, ATM should work properly with outline fonts inside the Extensions folder - but make sure to completely remove older versions of ATM before installing the updated version.
