Apple Font Pack

Article Created: October 1, 1992

TOPIC ---

The Apple Font Pack, a retail software product, includes a selection of
TrueType fonts from leading type vendors. The Apple Font Pack addresses
the typographic needs of mainstream customers. It requires minimal system
overhead, and makes fonts easy to use with one-click installation and a
booklet to educate customers on how to effectively use type to create
compelling documents. It is available through authorized resellers.

DISCUSSION --

Contents

The Apple Font Pack contains:

• 25 new Apple fonts, all from leading type foundries. These are listed
  below.

• 18 of the fonts Apple has been shipping with the LaserWriter and
  StyleWriter printers.

• The Apple LaserWriter Driver and LaserWriter Font Utility software for
  using the fonts with Apple and third-party PostScript laser printers.

The Apple Font Pack, added to the 21 fonts that come with System 7, brings
Apple's font offering for the Macintosh computer to 64.

Enhanced LaserWriter Printers

The 25 new fonts will also be added to the library of fonts included with
Apple's network printers: the LaserWriter IIf, LaserWriter IIg, and
Personal LaserWriter NTR. This boosts the font offering to 64 for
customers using any Macintosh computer with these printers.

Compatibility and Configurations

The Apple Font Pack requires a Macintosh personal computer running System

7.   The LaserWriter IIf, LaserWriter IIg, and Personal LaserWriter NTR
printer font sets are compatible with Macintosh computers running System
6.0.7 or System 7.   Once installed, the fonts are compatible with any
Macintosh printer or output device, and with third-party printers.
