TOPIC --

This article presents the frequently asked questions (FAQ) on the Apple Font
Pack.

DISCUSSION ---

Question: The package says there are 43 fonts included, but I only count 35.
Where are the other 8 fonts?

Answer: There aren't any missing fonts. The Apple Font Pack contains 43 TrueType
fonts, even though only 35 font icons are on the Font Pack disks.

To conserve hard disk space, 8 of the fonts don't have files and icons. The
system software generates these fonts using other fonts in the same family. The
8 fonts have designs that allow the system to produce them with good typographic
quality results. The 8 fonts that have no font icons are:

• ITC Lubalin Graph Oblique (from ITC Lubalin Graph)
• ITC Lubalin Graph Bold Oblique (from ITC Lubalin Graph Bold)
• Helvetica Black Oblique (from Helvetica Black)
• Helvetica Compressed Oblique (from Helvetica Compressed)
• Avant Garde Italic (from Avant Garde)
• Avant Garde Bold Italic (from Avant Garde Bold)
• N Helvetica Narrow Italic (from Helvetica Narrow)
• N Helvetica Narrow Bold Italic (from Helvetica Narrow Bold)

Question: All I get is Courier when printing.

Answer: Turn on "Unlimited Downloadable Fonts" in the Page Setup Options
dialog.

Question: I just installed the Font Pack. Why is my printer so slow now?

Answer: Slower printing results when documents have several typefaces, and

because TrueType fonts print at the highest possible resolution your printer allows.

Question: How do I make the special characters and the strike over characters with the Zeal font?

Answer: You can use the Key Caps desk accessory to view them. Or, refer to page 23 of the "Getting Started with Type" manual that came with your Font Pack.
