Fonts: Location Relative to Version of Operating System (2/95)

Article Created: 1 September 1993
Article Reviewed/Updated: 15 February 1995

TOPIC --

The chart below describes where to properly place fonts relative to the
version of the operating system in use.

DISCUSSION --

```
.                       Bitmap      PostScript          TrueType
.                    ---------------------------------------------------
.System 6.x                      I                   I
.                    Use         I                   I
.                    Font/DA     I                   I
.                    mover to    I   System          I   System
.                    install     I                   I   file
.                    fonts       I   Folder          I
.                    into System I                   I   * (see below)
.                    file        I                   I
.                    ---------------------------------------------------
.                                |                   |
.System 7.0          Drag to     I                   I
.   and              System      I   Extensions      I   System
.System 7.0.1        file **     I   folder **       I   file **
.                    ---------------------------------------------------
.                                I                   I
.System 7.1            Font      I   Font            I   Font
.                    folder **   I   folder **       I   folder **
.                                |                   |
.                    ---------------------------------------------------
.                                I                   I
.System 7.5            Font      I   Font            I   Font
.                    folder **   I   folder **       I   folder **
.                                |                   |
.                    ---------------------------------------------------
```

NOTE
* TrueType fonts don't work with system software version 6.0.4 or earlier and
versions 6.0.5 through 6.0.8 require the TrueType INIT.

** System 7.0, System 7.0.1, and System 7.1 will automatically place Bitmap, PostScript, and TrueType fonts in the proper locations when they are dragged to the System Folder.

Article Change History:
15 Feb 1995 - Reviewed for technical accuracy.
06 Sep 1994 - Added System 7.5 information to article, revised title.
